

A review of the Draft 2 of Energy Star Program Requirements for Refrigerated Beverage Vending Machines was just completed by me. Since the Standard was reviewed by several companies previously, most of the Standard looks "ready to go". I did want to comment on a couple of items.

- In the Partner Commitment Section, on page one, the note discusses placement of the Energy Star label. It seems like it may be possible to install it on the front next to existing mandatory labels. For instance, we install the Tilt Warning label, and there is often space adjacent to that.
- Also on page one, the final sentence states the partner is to "provide to EPA, on an annual basis, an updated list of Energy Star qualifying refrigerated..". It is more meaningful to me to say,

"provide to EPA, on an annual basis, updates of Energy Star qualifying refrigerated...". The original statement makes it sound like a complete new list would have to be made each year. That could run into more paperwork maintenance.

- In the Eligibility Criteria Section, on page one, Item 1A, it says "... dispense bottled and canned beverages.. ". One of our machines will vend drinks sealed in a box. I propose the text read "... dispense bottled, canned, and other sealed beverages ...".

Best regards,
Marvin Echols
Vendo Co.
